CLIPS, QUOTES, and COMMENTS is issued on the first of each month, by the BORDERLAND SCIENCES RESEARCH ASSOCIATES -- 3524 Adams Ave., San Diego 16, California. Sample copy on request. Most back issues available. -- Twelve issues (12 months) - $5.00; six issues (6 months) for $2.50; two issues for $1.00.

Meade Layne, M.A., Editor and BSR Director.

THE FLYING SAUCER: Published bi-monthly by C.P.D.V (Centro de Pesquisa dos Discos Voadores. Postal Box 8449, Sao Paulo, Brazil. Free distribution for Associates & C.P.D.V. Correspondents everywhere.- BSRA Hdqrs. is just in receipt (Feb. 23) of their Bulletin No. 3, English edition, 16½ pages, 12½ x 9": "Reading time" for BSR Director, two hours.

(Some USA periodical, two-three decades back, used to print "reading time" at the head of every article -- 'A good commentary' said a U.of M. academician,'on the tensions of American life'. Maybe our BSR Associates would like us to revive this practise. Anyhow, the two hours on this formidable CPDV bulletin were so well spent, we're going to print a few quotes and semi-quotes, as needed escape from the customary.

"Do Saucers Have Bases on Earth? (pg 1 of the Bul.). Under this title Mr. Andrew Tomas from Australian Saucer Record has published an article in URANUS, Vol. 3 No. 2, Oct. 1956. Uranus is that good publication started by E. Biddle and now under David Wightman editorship. Mr. Tomas says he is convinced that the space ships are based in Asia, and explains that he has lived there for 25 years and studied both Chinese and Tibetan lore. Whatever Mr. Tomas uses as a basis for his opinion seems to be rather vague and is not convincing. But the important matter is the title he uses. . . His question is self-asked by all ufophiles whether they have lived for 25 years in the Far-East or because a gypsy told them ...

"The gypsy in this case is Mr. A.F., a cultured man holding diploma in theology formerly an instructor in physics in a seminary. Mr. A.F. told us that he has contact with a flying saucer crew and for several occasions has conversed "in very good Portuguese" (does this sound familiar?) with a crew member who seemed to be the boss. Mr. F. does not believe that the saucers come from another world, altho the saucer Captain assured him that particular one had come from one of Jupiter's satellites.

'This man' (says Mr. F., meaning the saucer boss) told me there are at least two saucer bases on earth ... used as repair stations. One is in the South Pacific and the other right here in Central Brazil.

"WHERE?" asked him all of us raising one eyebrow.

Mr. F. stared at us longly and answered gravely: In the banks of the Roosevelt River. We held our breath for a few seconds and gave him back his stare. I don't think that 0,001 % of all Brazilians know there's a river in Brazil named after Ted Roosevelt ... It flows thru the most inhospitable jungle in Brazil ... For a hiding place the saucers could not have chosen better. Even today there's not one single airline flying over this region.

'If Mr. F's story is nothing but a good yarn we congratulate him for his prodigious imagination. His tale is much more convincing than both Adamski's and Allingham's. Many details are technically correct ... there are many clues that tackle so one gets simply dazed to say the least. . . . .

November Fiasco: Some jocker in the USA (I think his name is Miller) said in a radio and TV interview that he had once hopped a ride on a saucer. Later the TV station reproduced a tape record of a speech made by a certain character named MON-KA, from Mars, "who" stated that on Nov. 7 at 22:30 (California time) he would come through KOR radio station and deliver a message. Of course nobody believed Miller but at the appointed time listeners and telespectators stood by their sets... The rest you know ... or guess.

Let Us Standardize: (We request this because) it is sometimes difficult to deal with verstas, stadia, kilometers, knots, miles, N.Y. local time; 14:30 in Rio, 5:47 pm SCT, 183 deg.F. 23 C. 49 R., 42 lbs, 22 stones and a score of other units

From now on we will use meters, kilometers per hour, degrees Centigrade, time GMT and for currency US dollars. Could not Flying Saucer Review of London set up a standard? But please don't stick to exclusively traditional British standards. Remember - astronomers are now using decimal or centesimal metric system.

(Concerning the Bridge on the Moon - and see Flying Saucer Conspiracy, by Keyhoe, pg 77,78, Holt & Co. NY '55. The CPDV Editor, Sr. Simoes, falls into confusion, wants to fall out but can't quite make it. On page 3 of the bulletin --) --

. . . Well? Who's mystifying whom? If Dr. Wilkins really said "It looks almost artificial" he more than suggested the bridge existence. But when he says in his own book ... "of course, no such suggestion was ever advanced", we who are about to die don't exactly know what to think. To save my own face, though I have never believed the bridge story, I will suggest that in radio and TV shows the questions and answers are most of the time previously arranged for the effect they may produce; then a word is cut off here, another there, and when the show goes on the air -- line, sinker and hook are liable to go down someone's throat.

"Perhaps it is well the bridge is busted, but let us not forget that blunders of likely nature allied to the yarn of a few "artists" will throw much more discredit into the saucers story and we will again be bashful when mentioning saucers, thus hindering well-meant researches. All we can say now is that flying saucers do exist, but mystification seems to exist in a much greater scale .

(Bul. pg 5): "Ball of fire seems to fall and leaves non-ferrous dejections in Moji-Mirim, S.P. We quote from Diario da Noite of Sao Paulo, 2nd edition, Dec. 11: Mrs Guiomar Bianchi ... is an instructor of industrial arts... She is con - sidered to be idoneous, sound of body and mind, and we have gotten straight from her mouth the story of a strange ball of fire ... An indescribable and mysterious thing coming from the East ... the light was intense ... I was blind and confused. The thing was noiseless. When my vision was reestablished I noticed there was some smoke coming from the ground... The smoke originated from a white liquid ...(which) soon became solid and we could see in the backyard several small bits of what looked like lead and aluminum" (end of quote from Diario). The CPDV Bul. adds: "A newspaper man from Moji-Mirim suggested that the unknown material was plain soldering bar thrown at Mrs. Bianchi while molten. . . .

(Bul. pg 10) "What constitutes a proof? Does a UFO have to land at the River Entrance to the Pentagon, near the Joint Chiefs of Staff offices? Or is it proof when a ground radar station detects a UFO, sends a jet to intercept it, the jet pilot sees it and locks on with his radar, only to have the UFO streak away at a phenomenal speed? Is it any proof when a jet pilot fires at a UFO and sticks to his story even under threat of court martial? " (Where have we heard something like this short lesson in semantics? Oh, yes! From BSR Hdqrs., about every-other issue of our publications for the last ten years! ml.).

"We would like to distribute freely" (writes Editor Simoes) "tons and tons of our Bulletin, but the postal fee has been raised 2,000%; the postmaster stubborn- ly refuses to accept unstamped letters, mimeograph stencils are now coming from Tcheooslovakia at an impossible price, and de dear dear U.S. dollar is above 65 cruzeiros in the free market (they call it free !!!). The only thing that costs nothing to CPDV is the work of its Directors. New subscribers may have to be - come associates if they live in Brazil, those living abroad will know pretty soon what can be done for them ..." --- (The easiest way is to spend a dollar or so at the postoffice for international exchange coupons and send to address at begin- ing of this article. ML).

COMBUSTION OF METALS

from Flying Saucer Review, III-1; Jan-Feb.1957 *

A long series of mysterious fires and explosions in U.S. atomic plants is being investigated by the US Atomic Energy Commission, the Daily Telegraph reported on January 26.

These fires were caused through spontaneous combustion of metals like uranium, plutonium, thorium and zirconium. The first three are atomic fuels, and zirconium is a favorite metal for 'canning' fuel and structural work.

It is understood that there is a fire risk when these metals are in a finely divided state, like powder. However, the odd thing about these is that the metal was often in lumps. Heat is wanted to start even metals in a powder, but fires occurred even when the lumps of metal were cold. In one case the metal was resting on dry ice. This is solid carbon dioxide, with a temperature of more than 50 deg. below zero. Even more curious ... some of the fires happened when the materials were in so-called 'inert' gages, like argon, which are normally considered to make combustion impossible.

What has all this to do with the UFO phenomena? Flying saucer researchers will recall the great mystery of the pockmarked windscreens. Thousands of reports of shattered windscreens came in from England, France, Italy, Canada and the United States. One of the most strange cases (in April, 1954) concerned a weird blue mist that settled on a car. While its occupants watched, the glass in the car shattered into pieces.

George Hunt Williamson in his recent book, Other Tongues, Other Flesh, forecast that the glass shattering phenomena would soon spread to metals. The Borderland Science Research Associates, directed by Meade Layne, as long ago as 1954 were predicting that the glass disease would spread to metals. Those interested should read the article by Edward S. Schultz, entitled The Growing Windshield Damage Phenomenon, suggesting clues to solution of a mystery with serious implications. This appeared in the BSRA publication Round Robin, Vol. X, No.1. (The address of the BSR Hdqrs. is 3524 Adams Ave., San Diego 16, Calif.

- end -

So far as our reading goes, the six-page brochure by BSR Associate E.S. Schultz is the only competent and worth-while analysis of this "glass disease" ever offered the public. Interest in the matter died out when the trouble seemed to subside. We have now mimeographed additional copies of the brochure - ($1.00 each). A few lines from the closing paragraph of the article will suggest the serious nature of this phenomenon: a wide-spread metal disease might cause all metal construction to crumble of its own weight. "Transportation and manufacture as we know them might become things of the past.". . Who can say with certainty that this glass damage (now of metal and visible combustion) is not a prelude to serious intervention in planetary affairs by visiting entities from Space or the ethers? Consider the unexpected neatness of that kind of intervention. No public threats, no violence, no explosives -- just a subtle and silent crumbling of our metals, beginning with siiicon or some other ingredient of glass. Is this a saga of scientifiction? It can hardly be more extravagant and improbable than the world-wide phenomena now on record in hundreds of books and thousands of newspapers. We can only 'wait and see' - wait, watch, and learn.

* Flying Saucer Review is pub. at 1 Daughty St., W.C. 1, Lon., Eng. Bi-Mo. Yr.$3.50

MORE ABOUT COLOUR THERAPY : By Bruce Copen, F.B.R.A.

There are two main types of colour therapy; colour treatment by electric lamps with tuned filters, or the NON-luminous colour therapy method.

In the first we use the seven main spectrum colours, either independently or as a combination ... until radiesthesia was brought into this therapy as an aid to the selection of the right colour for each patient .. the actual selection was done on a textbook style. We must constantly be aware that every person is an individual, and each one of us reacts differently to colours; therefore it was essential that radiesthetic methods should be applied in selecting the correct therapeutic colour in its right dosage.

The non-luminous colour therapy is essentially a radiesthesic invention. Instead of using colour lamps, a special type instrument made by the Copen Laboratory is tuned to one of 360 shades to suit the complaint of the patient; the actual treatment is odic/magnetic and has proven itself to be most effective and quick in its curative measures. .. It is a most powerful medium and has been used by practitioners the world over. The handbook, with photos of the instrument, is available (USA .40). . .

Colour therapy in any form is a most potent form of healing and is swiftly gaining ground in all parts of the world. . .

(The foregoing paragraphs are quoted from a 20-page brochure: "A Guide to Medical Radiesthesia & Radionics" - by Bruce Copen. The author explains that "there is, strictly speaking, no dividing line between radiesthesia and radionics; taken together they constitute a complete science of manipulating subtle radiations." Address the Copen Radiesthesia Laboratory, Nairdwood Lane, Prestwood, Buckinghamshire, England.

THE RADIONIC ASSOCIATION OF GREAT BRITAIN issues a special number of much interest, entitled Radionic Therapy, the Original Concepts of Dr. Albert Abrams - a Lecture delivered March 17, 1956, by Dr. Eric Perkins - 'probably the last surviving friend of Dr. Abrams in England'. As a summary and clarification of the remarkable work of Dr. Abrams, this 27-page brochure is superior to anything I have read ... With true British modesty (or something) the Radionic Association fails to give its address, but this can be obtained by sending inquiries in care of The Delawarr Laboratories, Raleigh Park Road, Oxford, Eng.Price of the booklet, .55.

ASSOCIATE Zan Overall (Reseda, California), writes: "I understand, from good sources, that Frank Edwards is set to do a news series for Pabst on a Midwest network -- soon, and that more letters to Pabst, added to those already received, might induce them to extend the coverage to the West Coast, and perhaps go national. -

". . . Mention of this in your publication might bring enough letters to turn the tide. Send them to: Marshall Lachner, Pres., Pabst Brewing Co., Merchandise Mart, Chicago 54, Illinois."

(GOOD Idea! It might help, and 'You never can tell'. ---) ml

". . . Briefly, OAHSPE was mechanically written through my hands by some other intelligence than my own. Many spiritualists are acquainted with this automatic movement of the hands, independent of one's volition. Many people have this quality. This power can be educated, or rather, the susceptibility to external power can be increased. In my own case I discovered, many years ago, in sitting in spiritual - istic circles to obtain spirit manifestations, that my hands could not lie still on the table but would fly into these "tantrums". Often they would write messages, left or right, backward or forward, nor could I control them in any other way than by withdrawing from the table. Sometimes the power thus baffled would attack my tongue, or my eyes, or my ears, and I talked and saw and heard differently from my normal state. I went to work in earnest to investigate spiritualism, and I investigated over two hundred mediums, travelling hundreds and hundreds of miles for this purpose. Often I took them to my own house and experimented with them to my heart's content. I found that nearly all of them were subject to this involuntary movement of the hands or to entrancement. They told me it was angels controlling them. In ten or more years I began to believe in spiritualism. But I was not satisfied with the communications; I was craving for the light of heaven. I did not desire communications from friends or relatives, or information about earthly things; I wished to learn something about the spirit-world; what the angels did, how they travelled, and the general plan of the universe. After awhile I decided that wise and exalted angels would commune better with us if we purified ourselves physically and spiritually. I gave up eating flesh and fish, milk and butter, rose before daybreak, bathed twice a day, and, occupying a small room alone, where I sat every morning half an hour before sunrise, recounting daily to my Creator my shortcomings i n governing myself in thought and deed. In six years I reduced from two hundred and fifty pounds to one hundred and eighty. A new lease of life came to me.

"Then a new condition of control came upon my hands; instead of the angels holding my hands as formerly, they held their hands over my head (and they were clothed with sufficient materiality for me to see them) and a light fell upon my hands a s they lay on the table. I had attained to hear audible angel voices near me. I was directed to get a typewriter. This I did, and I applied myself industriously t o learn it but with only indifferent success. For two years more the angels propounded to me questions relative to heaven and earth, which no mortal could answer very intelligently. I look back on those two years as an enigma. Perhaps it was to show me that man is an ignoramus at best; perhaps I needed constitutional growth. One morning the light struck both my hands on the back, and they went for the typewriter vigorously. I was told not to read what was typed. Each morning, before sunrise, the power came and typed. One morning I looked out the window and BEHELD THE LINE OF LIGHT, that rested on my hands, EXTENDING HEAVENWARD LIKE A WIRE TOWARDS THE SKY. Over my head were three pair of hands, fully materialized; behind me stood an angel with her hands on my shoulders. My looking did not disturb the scene; my hands kept right on typing.

"For fifty weeks this continued, every morning before sunrise, then it ceased, and I was told to read and publish the book OAHSPE. The drawings in OAHSPE were made the same way, with pencil. A few of the drawings I was told to copy from other books, such as Saturn, the Egyptian ceremonies, etc. - - All the while I have pursued my vocation (dentistry). . ."

- - - - - - - - - - - - - - -

The foregoing is from a letter written by Dr. Newbrough to the Banner of Light, dated January 21, 1883, and copied in full by KOSMON PIONEER for Dec. 1956. The PIONEER is published at Montrose, Colo (Rt. 2 Box 26-A). 20 ¢ ea., yr. $2.00. --- OAHSPE, one of the most remarkable books ever written, is obtainable from this same address (890 pages; $10.00).

ml

The Little Listening Post, at 4811 Illinois Ave., N.W., Washington, D.C., has just been given permission to release the following ANNOUNCEMENT of great importance to saucer researchers, saucer clubs and publishers of saucer bulletins the world over:

"There has now been formed in Washington, D.C., THE NATIONAL INVESTIGATIONS COMMITTEE ON AERIAL PHENOMENA., a 24-page Prospectus shows the wide scope of the organization, which will act as an Information Center and Clearing House for every phase of the subject related to the phenomena in our skies. It will also act as liaison between objective science and abstract interpretations in this field. . . .

"The NATIONAL INVESTIGATIONS COMMITTEE plans to publish two magazines -- One, 'a monthly scientific journal containing not only a record of meetings and matters of interest to the membership, but also statistics and summaries of important investigations conducted by the Committee. This publication may contain authoritative technical articles on the subject of space flight and the progress being made in the United States and in various countries of the world." . . . The other magazine, "Space Flight", will be a popular monthly of high quality, semi-technical, with photographs in color and selected science fictions. This magazine will probably be published under franchise and could provide a substantial source of income. . . .

"If you want to help, or if you want more information -- write to THE NATIONAL INVESTIGATIONS COMMITTEE ON AERIAL PHENOMENA, 1536 Connecticut Avenue, Washington, D.C., or to "The Little Listening Post At Washington, D.C." -- (address:)- 4811 Illinois Ave., N.W., Washington, D.C."

---- -

OPINIONS OF DR. LEE DE FOREST: "Dr. Lee De Forest, prominent American scientist, today predicted that man will never reach the Moon 'regardless of all future scientific advances.' De Forest, sometimes described as the father of electronics, said that ' man is inherently an earthy creature, and only his scientific imagination will ever make him a planetary emigrant.'

"De Forest forecast transoceanic television within ten years. 'But I am much more conservative in my estimate of interspace flight,' De Forest said. 'To place a man in a multi-stage rocket and project him into the controlling gravitational field of the Moon, where the passenger can make scientific observations, perhaps land alive, and then return to earth -- all that constitutes a wild dream worthy of Jules Verne,' he said.

'I am bold enough to say that such a man-made Moon voyage will never occur regardless of all future scientific advances."

-end-

(Editor's comment: This distinguished scientist probably knows naught of this, and cares less -- but the Probert Controls said long ago that no human in his normal human body would ever achieve true space flight, tho he might try for a few short flaps in nearby space and even get as far as the moon. For space flight the human would require a "conditioning of the whole psycho-physical organism by exposure to specific wave frequencies". And certainly there is empirical evidence to indicate that many (probably all) of the UFO are surrounded by powerful magnetic or vibratory fields very dangerous to humans. Death would not be immediate, but inevitable and soon. There are also (we are told) subliminal factors not as yet reckoned with at all. However he came by it, Dr. Lee De Forest seems to have an intuitive grasp of these conditions. He can use his favorite pun again - this is the Forest's prime evil .....

ml

Concerning the "B-Cell" -- Letters to the Editor:

"In answer to your recent inquiry: Yes, we checkd both the activated water and particles of the solid from the matrix, using the compound microscope. Both showed the light phenomena. Regarding the plants we'll probably have to wait till spring to see what's what with them ... Yes, we're all drinking the well water with the B-cell in it. It tastes fine and is fine; even my three years old daughter doesn't ask for 'just water' but always for B-water. "
(Mrs. R.L. Belohlavek, Parma, Ohio).

"I want to tell you that I sent for Mr. Brown's B-cell and am now drinking the treated water. Have only been using it a little over a week. I believe he has something but just what-all it will do we shall find out. My skin and hair were very dry and my hair was coming out by the handful. This falling out has stopped, the dryness has disappeared and my hair has a lovely luster. I thought maybe you would like to know this. . "
(Ruth Grant; Malibu Beach, Calif.)

The foregoing are fair samples of unsolicited comments. Mr. John Brown, dis - coverer of the B-cell, is not at present offering anything for sale, nor does he make specific claims for any medical or therapeutic values in the activated water. He does claim to have an immense amount of experimental data showing remarkable effects of the B-cell on the growth of plants, fruits, and vegetables - all of which data being open to any honest investigator, but so far almost wholly neglected.

Samples of the B-Cell are contained in small non-soluble plaster matrixes re- sembling peppermint lozenges, which are distributed without charge, on request. This applies also to a mimeo brochure giving many details. Material at hand is so extensive (covering more than ten years of research) that we can only mention it here; but some kind of biological unity is involved (note the 'light flashes'), the Cell is at least harmless, anyone can experiment with it, and all reports com- ing to BSR Hdqrs. have been favorable.

Address Mr. John Brown, at The B-Cell Laboratory, 92 Miller St., Middleboro, Mass., ask for information and sample matrix (containing concentrate culture of B crystal cells, organic matter, and minerals). CQC will be glad to hear of any definitive results, especially where there are adequate controls.

As an addendum to the above: the magazine ABERREE, Vol. 3 No.10, March 1957, carries an article by John.C. Brown, titled Water Purified and Life-Giving, pgs 3-4 ff Address ABERREE at PO Box 528, Enid, Okla. Single copy, .25

The Aberree article includes the following statements: "This living organism will neutralize the fall-out from bombs now poisoning the atmosphere ... as well as the poisons now being put into streams and reservoirs ... the water vapor from the catalyzed water effects this neutralization of A and H bomb fall-out, but scien - tists as yet will not even investigate this ...". This is, of course, a very re- markable claim, but it is certainly not the part of wisdom to condemn or ignore it without fair examination, especially where a decade of spade-work has already been done and a great amount of data accumulated. . . The hostility of the AMA and the Food & Drug Adm. in itself suggests that biologist John C. Brown 'has something' of real importance to humanity.
ml

- -

We do not usually print items of war news, but this time -- from "Common Sense"-- "Information has leaked that approximately 3,000 British paratroopers were annihi- lated while landing in broad daylight in the Suez area."

MISCELLANEA - from the Mark Probert seances -

The Voice of the Yada.

'Spooks! Speaking of spooks, you are all spooks yourselves - spooks with your coats on.

'Some time you will learn how NOT to leave your body behind when you die. The body is an extension of the mind - of consciousness. There is nothing miraculous about taking your body with you . . . It is known that the flow of the blood can be controlled by the mind . . . and it is known by those who are informed that you can leave the body and as consciousness roam wherever you wish.

'Learn to love yourself. That means, to understand your self. This is necessary before you can understand and love others. Let your body be aware that you love it. If you do not do this the mind may become offended through frustration. It may attack the body through the glands and so react on the nervous system.

'Any idea once created must come to birth sooner or later - or it will kill you. Fear is the greatest killer.

'It is best to stay in the body as long as you can. The body is a special kind of school. There is a better chance to learn here on earth than anywhere else. You go on for years without learning, then at almost the end you begin to cry out, 'give me one more minute, please'.

'In the astral you will find yourself doing at once anything you think of. You have to be trained all over again. You cannot make plans in advance. The astral world is a world of individual dreams.

'Why are you so anxious to learn about your past lives? You come to me and ask me to tell you about them. But when any true seer - see-er does this, what he sees may sear you indeed. Ah-ha! a pun! Suppose I look and see that this person has been brutal and low. Can I tell him that? Do not be concerned about your past; see what you can do for yourself in the NOW.

Whether you were a saint or the reverse in a past life, I do not care to take on the Karma of any other person' (by reporting such information).

'Death is but stepping into another room. It is our emotions that drag us back to earth. But all that you need to prevent coming back (into earth life) is love. . . Man has no will - he is not born with a will but develops it from first babyhood by making choices . . . Try to go along with life - to experience all that it brings you. To do this, love is necessary.

(A Question about cremation): 'Yes, cremation is better than burial - far better. But it does not have much effect on the length of time spent in the astral body. But it keeps the consciousness of the 'dead' person from staying around the corpse. Because of this attraction, astral guards can be imposed over tombs and treasures, with curses against violators.' (Whence many burial customs, especially Egyptian).

(Question about atomic power): 'Its use is one big cremation. Perhaps everybody will be asking, 'what's cooking?'. No, it is not safe to continue the atomic tests but you will not die (from the fall-out) right away, though you might be better off if you did. If you think cancer is bad, wait till you see the results of atomic radiation. The bone marrow is destroyed by it.

'This is the first time in history that man has created atomic power to this extent and in this way'

'Russia will not attack your country or any other with atomic power. That is because she wants to take everything in good condition. Her policy is to do a little fighting and employ sabotage but not for direct destruction. If you are not very alert she will succeed in this. A Trojan horse policy.

'Russian scientists know as well as do yours that atomic power in warfare would be the beginning of the greatest destruction ever known. It would take 5,000 years for the earth to recover from such warfare. . .

'The more imminent danger is the treatment of atomic wastes. To sink these in the sea is merely to poison the fish and the sea water. These wastes are a white elephant. Yet man is a being who can counteract any condition he makes.

'In the not too-distant future there will be a different kind of human. Among the Disc people are extraordinary shapes. You call them monsters, but wait until you are a monster yourself. I am very serious about this. Genetic changes are taking place. I know - I have watched. People do not 'get over' doses of radiation. It eats up the body - burns it up.. Gamma rays - X-rays!. You live in a world of things invisible - and therefore you die of these things.

This mischief is in large measure already accomplished - so that stopping the experiments will not make a great deal of difference. Doing so might encourage the Russians to stop also.

'The underground races were driven there to escape genetic changes. They had no need of clothing and clothing was an added danger to them. They abandoned all normal moral codes. The lack of light made them pallid or greenish and excess of arsenic caused them to lose their hair. They developed bulging eyes and their bodies shrunk in size. Some of these people are at a depth of 15 to 20 miles, but others are as far as 200 miles below the surface.

'The leprachauns are also an underground people and are neither etheric nor astral. Driven underground by certain harmful rays of the sun. From five to 20 miles below the surface. They no doubt utilized natural caverns but other under-earth dwellers had means of disintegrating earth strata and driving huge tunnels by what you now call atomic power. Many of these tunnels still exist. There was communication by this means between Egypt and Tibet.. .

'Pyramids were built in both north and south polar regions, and still exist there under the ice.

'What you call petrified wood was first of all frozen wood.

'The Masonic Lodge had its beginnings in Egypt about 1200 B.C., among the Etheric Lords. Certain persons expelled from the Masonic Order may be regarded as the true founders of the Catholic Church.

'An atom is a wave pattern. The space people understand how to break up or rather how to separate the constituent parts of the atom without at the same time releasing destructive radiations. They know how to separate the links of force that join particles together. For anyone who knows not how, this is very dangerous. When you learn how you can peel the atom down as far as you wish. . . At 98.6 deg. the body releases enough energy to burn carbon which otherwise burns at 2500 deg. F. and does this by breaking down the carbon into very minute quantities . . By certain forms of magnetic radiation the atom can be made to separate very slowly. *

- - - - - - - - - - - - - - - - - - -

* Note: compare here the incident of the fingernail imprint made in the hard-wood table top by the (alleged) Venusian visitor to the Los Angeles newspaper office.

The last paragraph above ("an atom" etc.) should possibly be credited to some other communicator than the Yada - due to confusion in stenographic notes.

THE WIDER AND BLUER YONDER" (AP dispatch from San Diego, Feb. 20). MajorGen.B.A. Schriever, ballistic missiles expert, says that 'several decades from now the important battles may be space battles.' What about the important battles that are going on right now, General? - not to mention the historical ones. You aren't old enough to remember the one that occurred Apr. 26, 1812, over Normandy. In that aerial melee the shell fire between a fiery globe and a rectangular 'cloud' at great height above Laigle in broad daylight rocked the countryside and littered the ground with fragments. More recent ... was the aerial battle that took place over Saw Mill Run, Penna., on July 28, 1874. Two black clouds flashing lightning and booming thunder sailed into each other before the horrified gaze of the inhabitants. The clash resulted in a cloudburst which drowned 150 innocent Saw Millians. But surely, General, you must have read most eagerly Air Intelligence reports on the space ship that was blasted to smithereens by SOME BODY, 30 miles above Norton, Kansas, on Feb. 18, 1948. The explosion rocked six states - a really staggering hallucination you might say. And then just two years ago this month there was the twin torpedo space ship, hunted down by some invisible, ruthless killer, that came in from over the sea near Westport, New Zealand. This one also was blown up with a roar that shook the entire region - so completely that not a piece was found. Total destruction of the enemy occurred again just three months ago above Wilmington, Dela., on the morning of Nov. 20. The explosion rocked the Harrington-Dover area. Both radar and ground observers saw a huge 'aircraft' disintegrate completely as its fragments headed earthward.

Judging from your remarks to the San Diego symposium in San Diego, General, it appears that you military men see beyond the destruction or collapse of the Communist regime to that inevitable day - oh horrid thought - when a military career might suddenly have no purpose - unless you can turn America's fabulous weapons into the solar system, and - happy thought - set out on a voyage of space conquest beyond your wildest dreams of glory. '

(The foregoing is selected from Bulletin No. 2, Vol. II, of the AKUALELE RESEARCH GROUP, Riley Crabb, Director. P.O. Box 1513, Honolulu, Hawaii. (Feb. 24, 1957). This 4-page Bulletin is packed full of thoughtful and unusual material and we heartily recommend it to our BSR Associates. No price stated, but "dear dear dollar" or some part thereof could probably be used to advantage.

We again call attention to SPACEMEN, FRIENDS AND FOES -- a brochure in two parts, 18 pages each, by T. James. Both parts for $2.00 (total price). Mr.James presents what he believes to be authentic information in a modest and tentative fashion. It is not always pleasant reading, but much too important to be neglected. And quoting the ASHTAR entity, he writes:

"There is a broad general rule which you may apply for indentification - not exact, but a rule of thumb. The true interplanetary craft, the ventlas of our forces will manifest by colored lights, usually red, green, and white, flashing or constant. Those of 'satanic' forces seldom exhib colour, but show white or blue-white light. The craft used by the unfriendly forces are usually cigar - shaped. . . ." This brochure has made a good impression and BSR Hdqrs. chas about 25 copies on hand at the price mentioned - $2.00 for both parts (total price)
